

Inventory Management System

# Empower your pharmacy

Make informed inventory decisions

- ◆ **Implement** in **less than 5 man-hours**, including setup, installation, and training (compared to hundreds of man-hours for other pharmacy systems)
- ◆ **Organize** and **track** inventory needs and issues from **all vendors** in real time
- ◆ Encourage **tighter inventory control** by boosting front-line **confidence** and **insight** into the pharmacy's daily ordering operations
- ◆ Improve buying accuracy through **barcodes** and a **fine-tuned**, auto-updating drug **database**
- ◆ Facilitate a **direct** line of **communication** between **buyer** and **front-line staff**: communicate **backorders**, estimated arrival times, **special order** items, and more
- ◆ Go **paperless!** Get rid of cumbersome ordering / "want" books
